

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy Law protections. Since this law was implemented the unwanted called to our home have stopped. It has saved us time from continually running to the phone when it rings to look at the caller ID to see if we know the call or if it was UNKNOWN.

The law needs to stay in place as is. I should have the right to contact the companies I am interested in doing business with. I should not have to worry about a business I have not expressed interest in doing business with be given my personal information and then continually contact me. It is not right.
